

# HEALTH EDUCATION

The goal of Health Education at Cathedral Preparatory School is to reveal to the students, that the principles of the Roman Catholic Church are consistent with today's concept of a healthy human behavior. The goal is to show that the integration of all concepts taught come to fruition in the growth of the healthy human being. It is NOT how does health apply to life, but how do we apply all of our learning to our HEALTH – LIFE.

## HEALTH EDUCATION

<b>961 Health One</b>	One Quarter
